

12. Labour Market Situation of Young People

(Supplementary questionnaire of the "Labour Force Survey, Q4 2018")

A supplementary survey called "Labour Market Situation of Young People" was added again to the "Labour Force Survey, Q4 2018" which was carried out on the selected sample of households of the basic survey at the same time.

The aim of the survey was the complex examination of the 15–29 years old people in the following three themes:

- work, job search
- studies, qualifications, study-related work
- doing voluntary work

4.7% of respondents aged 15–29 who answered the basic survey did not answer the supplementary survey conducted in Q4 2018. Table 1 Non-performance rates (rates of those who answered the basic survey but did not answer the supplementary survey) of the supplementary survey titled "Labour Market Situation of Young People" conducted in Q4 2018 (weighted data).

There may be some differences between the same aggregates of the published absolute numbers due to weighting and summing up. The evaluation of the distribution ratios was made electronically – without individual correction, so the sum of partial data is not always equal to the displayed rounded value of the aggregated data.

The **questionnaire** contained the following questions.

**Weighted data and sample size of respondents to the supplementary survey titled
"Labour Market Situation of Young People" conducted in the fourth quarter of
2018**

If a variable (after grossing up) has a prevalence of between 2500 and 4999 persons, the data should be regarded with reservation due to the high sampling error associated with it; and if the occurrence is fewer than 2500 persons, the data cannot be evaluated.

In order to assure comparability over time with STADAT tables 4., educational attainment in tables 12. is displayed differently compared to the regularly published labour market related STADAT tables. Hereby we provide a compliance table.
